America was found and built on a competitive spirit. Our constitution speaks to this. I just don't understand why Microsoft is being singled out. Should Michael Jordan be asked to play with a hand behind his back. Should Tiger Woods be asked to give his opponents strokes. They either broke the law and should be punished or did they just build a better mouse trap? P.S. I would also be interested in knowing how much of "MY" tax dollars were spent on this case. Michael \
